

Plastic Drink Bottle Pure Water Washing Filling Capping Equipment

Water Filling Line Production Plant is one of advanced models which is our company combines international advanced self-filling process and technology developed specifically for mineral water, pure water and other non-gas beverage filling installation.

Features:

- 1) This bottling machine is mainly used for washing, filling and capping PET bottle which can fill non- carbonated drinks such as mineral water, pure water, wine and so on.
- 2) Bottle washing, filling and capping are achieved in one filling machine.
- 3) Fillex Filling machine adopts hanging type conveying-bottle structure to make changing bottle mold more convenient, faster and more laborsaving.

Features:

- Place & capping system. Automatic caps arranging, feeding.
- Electromagnetic capping heads, with burden discharge function,
- All 304stainless steel construction
- No bottle no caps delivery.
- Automatic stop when lack of bottle

Technical Parameter:

Model	RFC-W16-16-5	RFC-W24-24-8	RFC-W32-32-8	RFC-W40-40-10
Capacity	5,000-8,000bph	10,000-12,000bph	15,000bph	18,000bph
Suitable bottle	$\varphi=50-110\text{mm}$ H=160 -310mm 200-2500ml PET bottles			
Power	3.12kw	3.92kw	3.92kw	5.87kw
Dimension	2760x2060x2700	2800x2230x2700	3550x2650x2700	4700x3320x2700
Weight	3500kg	3800kg	4200kg	5000kg
