

SJ-7ZK Automatic Suppository Making Forming Machine line

SJ-7ZK Full-automatic Suppository Production Line is suitable for the production of special shape such as bullet head, torpedo shape bill, to meet the production of your suppository.

Performance and feature

1. Make the both of triangle and the dotted line knives completely coincide, make the bolted shell achieve the easy tear effect.
2. The on-line monitoring function of PLC can be used to detect and alarm the fault self-check.
3. Control station height reasonable design, machine operation is simple.

Technical Parameter

Model	SJ-7ZK
Commodity	Suppositories molding machine
Capacity	1 0000—12 000 pcs/h
Air pressure	≥0.7Mpa
Air consumption/min	1.5m ³ /min
Working voltage	3 phase 380V
Adopt forming shapes	Bullet, torpedo shapes and other shapes
Each distance of suppository	17.4mm
Packaging Film	PVC PVC\PE (thickness0.15mm)
Water consumption/h	50kg (recycling)
Total power	5.5KW
Machine Weight	600kg
Overall dimensions	Bullet, torpedo shapes and other shapes
