Candy Packing Machine DXD-1200

DXD-1200 Candy Packing Machine is suitable for automatic feeding and flow packing of candies or products of similar sizes.

The operation and control of the DXD-1200 Candy Packing Machine are completed by the PLC program controller, which allows you to clearly see the working status of the machine. It adopts a high-precision photoelectric color mark slotting system, and the cutting position is accurate. The wrapping film automatically stops when there is no candy on the running belt. The machine is suitable for automatic feeding and flow packing of candies, such as cotton candies, or products of similar sizes.

Technical Specification

1. For this candy pouch packing machine, we have both stainless steel cover and iron painted cover for customer's choice.
2. Dia. Of candy plate is 900mm, for needs of different candies; we have stainless steel 304 candy plates and teflon candy plates.
3. Use of famous brand electrical parts, ensures quality of this candy packing machine.
4. Use of 1 servo motor, simplifies operation of this automatic candy wrapping machine.
