

YB-ZT Z type Bucket Elevator Conveyor

Basket elevator application are very well suited for a broad range of free flowing food and non-food products in the food, agriculture, pharmaceutical, chemical industry, such as snack foods, frozen foods, fruits and vegetable, nuts, confectionary products. Machine features highly sanitary design with stainless steel structure and PP material.

Application and characteristics:

This machine is suitable for automatic transportation of candy, chocolate, beef, potato chips, fried rice dumplings, shrimp chips, plastics, hardware and other granular products such as food, medicine and chemical industry.

1. Through the chain bucket to lift the material to the vertical packaging machine / electronic scale, it can automatically stop when the material is full and start the conveying automatically when the material is short.
2. The overall height of the machine depends on the height of the packaging machine.
3. The mechanical shell can be made of carbon steel spray or 304 stainless steel (the hopper material is food grade plastic polypropylene PP).

Technical parameters:

- Model : ZT
- Material: Stainless steel #304
- Basket volume: 1.8 L
- Height: 3296 mm (custom made available)
- Infeed length: 863 mm
- Voltage: AC 220V, 1 phase, 50/60 Hz. AC 380V, 3 phase, 50/60 Hz.
- Power: 0.75 KWH
- Machine weight: 1200 kg.
- Dimension (packed box): 2050mm(L)X1350mm(W)X980mm(H)
