

PFM-0202WR Powder Filling Machine

Features

1. All stainless steel structure, combined transparent hopper, no tools, easy to dismantle and wash.
2. High precision servo motor control filling, accurate measurement.
3. Various product adjustment parameter recipes can be stored for future use, up to 30 process parameter recipes.
4. Bottle infeed adopts screw positioning, accurate positioning.
5. Touch screen PLC control, no bottle not filling, the machine remains in standby mode.
6. The part of the equipment contacting the material is made of 304 stainless steel, and the motor, cylinder, electrical fittings, pneumatic components, etc. are selected from well-known brands.
7. The equipment consists of PLC, touch screen, etc. to form the control core, maximize the control precision and stability of the machine.

Technical Parameters

Model	PFM-0202WR
Max. speed	20 bottle/min
Tablet size	100~130g
Filling accuracy	±3-5%
Weighing accuracy	±0.04-0.08g
Power supply	AC380V 50/60HZ
Compressed air & Air consumption	0.45 –0.7MPa、 Approx 20L/min clean air
Power consumption	Approx 3.5KW
Machine dimension / L*W*H	Approx 1600mm(L)×1200mm(W)×1680mm(H)
Machine weight	Approx 650kg
