

## *CXM1-DGZ Automatic Multifunction Filling Machine*

The automatic multi-functional filling machine is widely used in cosmetics, food, chemical raw materials and other industries. Various creams, milks, face creams, ointments, essential oils, laundry detergent, shampoo, shower gel, semi-fluids, honey and various viscous materials.

Advantages: fast filling speed, multi-purpose machine, Easy operation interface, small footprint, simple cleaning, wide range of use, servo motor control, stable and trouble-free, automatic feeding function, long service life, no need to arrive at the factory Debugging can be used.

The filling system adopts ultrasonic detection, accurate quantification, servo motor gear pump control, and material contact with 316L high-quality stainless steel

### **Technical specifications**

Filling head	Single head
Filling range	10g-1000g
Adapt to bottle height	10mm-250mm (can be customized)
Adapt to bottle diameter	20mm-130mm (can be customized)
Filling materials	water, cream, shampoo, shower gel, laundry detergent, essence
Filling speed	20-80b/m(depending on the filling volume, material and packaging material)
Filling accuracy	±1% (according to the filling volume material and packaging material)
Speed control	frequency conversion speed regulation
Equipment size:	1900X1100X1600 (mm)
Power supply	220V/110V 50/60Hz
Power	1.5kw
Material hopper	40L (can be customized)
