

NSL260 Strip Packing Machine

The NSL260 is a high-speed Strip Packing Machine and has been designed to pack capsules, tablets, or similar products.

Features:

- Feeding, sealing, slitting, and cutting is done automatically, reducing labor costs and therefore, reducing production costs.
- The exterior of the machine is made of premium stainless steel, in conformity with “GMP.”
- Compact and simple construction allow for easy maintenance and straightforward operation.
- The format changeover can be easily done within 40 minutes.

Technical Parameters

- Output (varies according to packing size): ≤ 1400 pcs/min.
- Max. Machine Speed: 80 punches/min.
- Max. Width of Packaging Material: ≤ 260 mm
- Machine Power: 3.75kw
- Machine Dimension (L×W×H): 1600×900×1900mm
- Machine Weight: 1200kg
