

## *XT-4510 Diagonal Sealing Labeling Machine*

Applicable to diagonal-sealing labeling and widely used in automatic sealing labeling in fields of medicine, daily use chemical and food. etc.

### **Technical Feature:**

- 1) Applicable to the pharmaceutical, food, cosmetic and other light industrial products such as oval, square, flat bottles on the single and double sides labeling.
- 2) The man-machine interface system is advanced and compatible, easy operation, complete functions, has a wealth of online help function
- 3) The bottle dividing device shaped general, any diameter of the bottle without replacement parts, rapid positioning adjustment; bilateral chain correction device ensure the material on the neutral
- 4) Special elastic pressing equipment ensure seeding materials stability
- 5) Automatic optical inspection, have nothing items come without labeling, and without label automatic correction or alarm and automatic detection function, to prevent leakage and waste
- 6) Labeling speed, conveyor speed, sub-bottle speed stepless speed, adjust as needed
- 7) The machine has the advantages of simple structure, compact structure, convenient operation and maintenance

**Technical parameter:**

Labeling capacity	40-220 pcs/min (Related to the material and label size)
Labeling accuracy	±1.0mm
Label size	(L) 20-300mm (H) 10-180mm
Material size	W) 20-200mm (H) 40-300mm
Roll inside	Φ76mm
Roll outside diameter	MAX Φ350mm
Machine size	(L) 2000* (W) 1600* (H) 1350(mm)
Power supply	AC220V 50Hz/60Hz 2000W
