

CF-300 Semi-Auto Capping Machine

This machine is designed to handle plastic screw cap, theft proof cap, flip cap and other general products cap.

Features

1. Capping speed: 6 ~ 12 bottles / minute, depending on the actual working speed of the operator.
2. For different size of cap, capping head is changeable.
3. Adjustable capping torque, no damage cap surface.
4. Capping head height is adjustable through a screw hand wheel.
5. Foot pad controller.
6. This machine does not contain air compressors, and must be self-prepared with an air pressure of 5 kg/cm or more.

Options

Different sizes of cap, additional lock heads are required.

SPECIFICATIONS

MODEL	CF-300
Power Output	1100W
Input Voltage	220V
Cap Diameter	25A
Frequency(KHZ)	30~55mm and 15~35mm
Machine Size	125-250K/Hz
N.W.	550*420*710 / mm
Generator Size	30Kg
