

Double-sided multi-function labeling machine BCST120-13

Feeding → bottle dividing → synchronous pressing → labeling → pressing label → online inspection and rejection → finished product.

This equipment can apply labels to one side and both sides of square bottles and flat bottles. Square bottles have 3 sides and 4 sides; flat bottles have 2 sides and labeling at the same time. It has a wide range of application and strong adaptability.

Features:

- The label supply, label feeding and paper receiving work independently, the label supply is stable and fast, which ensures the label supply speed and labeling accuracy.
- The bottle dividing mechanism adopts synchronous rubber wheel with stepless speed adjustment, and the bottle dividing distance can be set arbitrarily.
- The calibration mechanism adopts synchronous chain to ensure the stability and accuracy of calibration.
- Touch human-machine interface is simple and easy to learn. It has multi-group memory function. It is easy to change bottles with different specifications without adjusting the settings. It can be called directly. It has the feature of saving time and effort.
- Multi-point emergency stop button to ensure safe production.
- Universal adjustment mechanism with large adjustment range, suitable for labeling of various tapered bottles.
- Various labeling auxiliary mechanisms, such as 2-sided labeling, 3-sided labeling and 4-sided labeling, can also be done at the same time.

Technical Parameters:

Model	BCST120-13
Labeling speed	0~120 bottle/min
Labeling accuracy	± 1 mm
Air pressure	0.5~0.8Mpa
Applicable container range	Width20~200mm
Label range	Length 20~400mm
Voltage	110/220V 50/60 HZ
Power	1KW
WeightQuantity	600kg
Machine size	L:2100mm W:1400mm H:1600mm
