

30ML Bottle Filling Machine

It is one of the traditional filling and capping equipment. It is used in food, medicine, chemical industry, scientific research and other industries. It can fill and cap all kinds of low-dose liquids, such as oil and injection. It can automatically fill and cap bottles. The design is novel and reasonable. It is suitable for filling and capping bottles of various materials such as liquids, such as perfume, syrup, tincture, alcohol, wine, etc. It can be used alone or on the filling line, meeting the new GMP standard and EU certification.

Three Competitive Edges of Our Penicillin Bottle Filling Machine:

1. The machine is made of SUS304 and SUS316 stainless steel, which is easy to use and easy to operate and can carry out high-precision positioning.
2. The sealing adopts the method of three knife centrifugation, which can seal firmly and look very beautiful.
3. The machine complies with GMP standards.

Technical Parameters

Filling volume	5-50ml
Loading error	$\leq \pm 1\%$
Rotation (rolling) Cover pass rate	$\geq 99\%$
Production capacity	30-50BPM
	60-90BPM
Power supply	380V/50Hz
Power	2.0 kw
Weight	600 kg
Dimension	2000*1000*1500mm
