

DLL-420 Soft ALU/ALU Strip Packing Machine

The requirement for the medicine package is more higher because of high speed development of medicine industry. To suit development, our company successly developed new high-tech quality machine which is designed on the basis of comparison with the same type machine (DLL-160 and DLL-240) by our technician. The main function: Automatic feeding, crisp remove, material automatic filling, high speed heat-sealing, vertical and horizontal perforation, batch number printing, product cutting, defective sorting, finished product counting, waste material dispose, product output.

This machine adopt PLC system, each mechanism controlled by servo, machine will be running more steady and synchronism at high speed running.

Product feeding adopt roll cutting feeding, servo drive, PLC control, can effective raise machine speed and ensure synchronism and steady.

This machine is suitable for medicine, chemical, food requirement, it can higher product level and guarantee period, is new ideal automatic packaging equipment.

Technical Parameters

Speed of drum	4-11m/min
Packing Specification	440
AL/PL Laminated Foil	0.08*440mm
Electrothermal Power	3.2kw
Main Motor Power	1.55kw
Overall Dimension	1800*1100*2100(L*W*H)
Weight	1000kg
