

LD-PAF01 Automatic Double Heads Volumetric Talcum Powder Auger Dosing Filling Machine

Double heads automatic powder filling machine is suitable for all kinds of powdered, ultrafine powdered or powder granular material, canned, bottled, barreled. Such as: talcum powder, rice flour, protein powder, cocoa powder, coffee powder, powdered drugs, chicken powder, chicken, additives, sugar, dyes, flavors and spices, etc.

Features:

1. Versatile Filling Solution – Suitable for precise quantitative filling of various bottles, cans, and bags, with no restrictions on container types.
2. Durable Stainless Steel Construction – Built with high-quality stainless steel, with all contact parts made of food-grade 304 stainless steel for hygiene and durability.
3. Customizable Filling Motor Options – Equipped with either a stepper motor or an imported servo motor, based on customer preferences for accuracy and efficiency.
4. Smart Filling Control – Features a photoelectric sensor for automatic material detection, with an optional foot pedal switch for manual filling control.
5. Adjustable Feedback System for High Precision – The feedback value can be fine-tuned to meet different accuracy requirements, ensuring precise and consistent filling.

Specification:

Model	LD-PAF01
Filling Range	100-2000g (Customizable)
Filling Speed	10-25 bottle/min
Measurement accuracy	±1%
Power	4.5 KW
Working power supply	220V,50Hz
Working pressure	0.6-0.8MPa
Weight	500kg
Size	L11782*W3465.09*H2523.52(mm)
