

AEH-P/S Horizontal Shrink Tunnel

Features

- Applicable to various small size bottles
- Improve equipment utilization and ensure label fit
- Precise variable speed conveying, flexible to meet production line requirements
- Adjustable speed to match different production items
- High-performance design
- Durable and energy-saving, reducing production costs
- Digital temperature controller
- Controllable and stable quality
- Anti-scalding design
- Improve work safety

Description

- **Increased Productivity:** Fast and consistent shrink performance significantly boosts production efficiency.
- **Enhanced Safety:** Dual-layer insulation design reduces safety risks and ensures safer operation.
- **Flexible Application:** Versatile control settings adapt to various product requirements, ensuring production flexibility.
- **Cost Reduction:** Durable and reliable structural design minimizes maintenance and replacement frequency, leading to long-term operational savings.
- **Quick Return on Investment:** High efficiency and consistent quality enable rapid ROI and strengthen overall business competitiveness.

Specification

Model	AEH-160P/S	AEH-220P/S
Machine Dimensions (mm)	1600 x 600 x 1200	2200 x 600 x 1200
Power Supply	3P / 220V~415V	
Power Consumption	10KW	16KW
Weight	90Kg	180Kg
