

## *GPK-40H18E Automatic Carton Forming Bottom Sealer*

The automatic carton erector is developed and produced for mass production line. The vertical production speed can reach 18 ctns/min. It can draw cartons and form it simultaneously, and the price is 50% lower than other vertical erector in the same level. This erector has been widely used in food, medicine, beverage, tobacco, daily chemical, electronics and other industries.

### **FEATURES**

- Convenient auto-adjustment: Changing the size of the carton can be adjusted manually.
- PLC+ man-machine interface: Easy operation, simple maintenance and stable performance.
- Convenient unpacking: The bottom of the carton is folded and sealed during transportation without stopping. The whole process of the suction box, forming, bottom folding and sealing can be completed in 3 seconds.
- Save labor: The unpacking of goods is completed by machine instead of labor.
- Safer: Adding a transparent organic glass protective cover, and the door will automatically stop to avoid accidental operation.

## SPECIFICATIONS

MODEL	GPK-40H18E
Carton Opening Speed	14-18 cases/min
Carton Size	L200-450×W150-400×H100-400mm (The minimum cannot exist at the same time)
Power Supply	220V 50/60Hz 1 Phase
Power	240W
Adhesive Tape Width	55-72mm (Choose one type)
Carton Storage Quantity	80-100pcs (1000mm)
Air Consumption	450NL/min
Air Compressing	6-8kg/cm <sup>3</sup>
Table Height	620-670mm
Machine dimension	L2450×W2150×H1450mm
Machine Weight	750KG
