

Automatic Biscuits Cookies Flow Packing Machine Food Packaging Wrapping Machine JY-L600S

Designed for automated alignment and multi-piece packaging of surface-fragile and vulnerable products (e.g. biscuits, cookies, cracker, rice crisps, wafer bar etc).

It can be matching with large-scale production lines to achieve fully connection and automated production.

Specification

1. Servo control system with fully automated computer touchscreen operation
2. Dual-channel material handling system enables flexible switching between single/double-layer packaging mode, significantly improve the utilization rate of equipment.
3. Multi-zone temperature control structure, set data with touch screen parameter as need, elegant package and high quality sealing effect to guarantee your product quality.
4. Equipped with high-speed automatic film roller splicing structure make sure production and package line no stop
5. Equipped with automatic tracking system eliminates empty packages to guaranteed 100%packaging rate
6. Automatic fault /alarm display system, convenient for operation, maintenance and repair.
7. Multi-language operation screen meets global client requirements

Technical Specifications

Model	JY-L600S
Packing Speed	50-150ppm
Power source	380V 50Hz
Finished bag size	100-500mm
Total Power	12.5kw
Wrapping material	OPP/CPP/PET
