

YNYT Dish Wash Liquid Filling Machine

Dish wash liquid filling machine is equipped with feeding pump, this is more convenient for feeding filling material. Different filling range can be chosen and multiple filling nozzle can be customized according to operation need.

Dish wash liquid filling machine is widely applied to daily chemical product industry, such as cream, detergent liquid, shampoo, hand soap, dish washing liquid, shower gel and hand sanitizer, soap liquid, disinfectant liquid products and etc.

Features

1. The machine is made of high-quality stainless steel, which meets the requirements of GMP
2. The reciprocating motion of the piston cylinder is driven by the servo to perform metering and filling;
3. The adjustment of the filling volume can be completed directly by setting it on the touch screen
4. PLC control, touch screen operation setting, has the characteristics of stable and reliable performance, high filling accuracy, strong adaptability, simple operation and convenient maintenance;
5. The seal of nozzle & piston is specially selected based on filled material for wearing resistance, long life time use and high accuracy

Technical Parameters

Model	YNYT dish wash liquid filling machine
Voltage	220/110V50/60HZ
Power	500W
Working speed	30-70Bottles/min
Air pressure	0.4-0.6mpa
Filling range	10-100ml,50-500ml,100-1000ml,500-2500ml,1000-5000ml can be chosen
Filling Heads	2nozzles,4nozzles,6nozzles,8nozzles(can be customized)
Filling accuracy	$\leq\pm 1\%$
Weight	400kg
