

GS-650 Multi - Function High Speed Automatic Cartoning Machine

The Cartoning Machine is designed for auto packing products into carton. By connecting to carton opening machine and carton sealing machine, it saves more manpower and increases production efficiency.

Feature

- It adopts the PLC, closed loop servo(variable frequency) circuit automatic control system.
- It adopts the human-machine interface aviation operating system, which automatically displays the cartoning speed, quantity, fault causes and other performance parameters, and also displays operation and maintenance methods.
- The adjustment and use of various specifications within the stipulated range can be realized in one machine.
- It is provided with manual and automatic switching functions.
- The use instructions folding and cartoning functions can be completed synchronously.
- Three rows of batch numbers can be embossing printed on the box synchronously, and the function of printing the serial number can be added.
- It is provided with the automatic detection system, and the function of positioning, stopping and online elimination is provided for nonconforming products.

- It can be equipped with the hot melt adhesive machine.
- Through the dial adjustment and user-friendly mechanical memory device, simple calibration of the position of relevant devices can be carried out quickly to realize fast replacement among different sizes of products.

Application

Automatic cartoning machine is a high-tech carton packaging equipment, which has been widely used in carton packaging in medicine, food, daily necessities, hardware, electronics, toys, automobiles and other industries.

Product Parameters

Speed	less 260 boxes/min
Specifications of the paper carton	(80mm-180mm)x(20mm-90mm)x(15mm-55mm)
Specifications of the manual	(110mm-180mm)x(90mm-250mm)
Power	380V.50HZ
Total Power	3.7kw
Equipment dimensions	(3800-6500)mmx1200mmx1500mm
Compressed air pressure	0.6Mpa
Compressed tolerance	6m3/h
Weight	2200kg
