

## *DS-180S Horizontal Stand Up Pouch Packing Machine*

This series are designed for doypack with functions of making hanging hole, special shape, zipper or spout

### **Independent Film Unwind Unit:**

1. make sure good control of gilm tensile force
2. more flexible for roll film width or pouch specification
3. better doypack forming

### **Servo Advance System:**

1. easy computerized specification change
2. stable pouch advance with less deviation
3. big torque moment of pouch advance, suitable for big volume

### **Zipper Function:**

1. independent zipper unwind device
2. stable zipper tensile force control
3. even zipper seal

### **Spout Function:**

1. even spout seal with good appearance
2. high spout seal strength, no leakage

Technical Parameters

| Model             |        | DS-180S                |
|-------------------|--------|------------------------|
| Pouch Size        | mm     | min.90*110 max.180*260 |
| Packing Capacity  | ppm    | 40-60                  |
| Filing Capacity   | ml     | 1000                   |
| Power             | kw     | 8                      |
| Air Consumption   | NL/min | 200                    |
| Machine Dimension | mm     | L6000*W1100*H1500      |
| Weight            | kg     | 2200                   |
