

DC-10

Double-Chamber Tea Bag Packing Machine

Form double-chamber filter tea bags with string and a hard tag, with the envelope and counting configuration defined for your line.

Finished package

Double-chamber filter tea bag with string and hard tag

Confirm whether the quotation includes the STB-120 envelope unit. The local project reference includes outer envelopes and pre-counting; base-machine scope needs confirmation.

Packaging format illustration; final material and dimensions follow sample confirmation.

DC-10 | Reference specifications

Reference output	120 bags/min; subject to tea and configuration
Maximum dosing volume	10 cm ³
Tea bag sizes	45 x 60 mm or 40 x 60 mm
Hard tag size	28 x 32 mm
Thread length	148 ±5 mm
Reference connection	Staple; 13 mm before folding, 5 mm after folding
Hopper volume	13 dm ³
Reference envelope size	70 x 80 mm when envelope unit is included

Actual output, accuracy, materials, utilities and optional equipment must be confirmed in the project technical agreement.

For configuration review: provide tea samples, target dose, bag dimensions, packaging material, required output and destination electrical supply.
