SK-45A Automatic Vacuum Packaging Machine

For food vacuum packing

Thermoforming Machine is suitable for food packaging without manual bagging, which can increase productivity, save manpower, and save packaging material costs. Compared with traditional plastic wrap + poly box packaging commonly used in supermarkets, there are often problems such as liquid exposure or fresh food moving and deforming.

The new form of skin-packing perfectly attaches the film to the fresh food, so that the original appearance of the food is not deformed, and the juice is perfectly stored in the food, and it will not gradually overflow with the storage time. In addition, the film can also increase the brightness of food, just as it helps fresh food to make beautiful appearance, which is more attractive to consumers!

Features

►The PLC program is used to control the display and it is fully automatic.
►The vacuum pump is imported from Germany BUSCH.
Functions

The packaged product has the functions of moisture-proof, rust-proof, dust-proof and oxidation-proof, which can improve the shelf life, quality and value of the product.

Applications

Suitable for fishes, meats, cakes, foodstuffs vacuum skin packing.

Specification

SPECIFICATION／MODEL	SK-45A
Advanced length	200~300 mm
Max.Packing size	W362 x L300 mm
Max.Framing depth	35 mm
Forming film width	W422mm
Skin film width	W420mm
Packing capacity	3~5 cycle/min
Conveyor servo motor	1 KW
Vacuum pump	40M³/hr x 1, 302M³/hr x 1
Waste film rewind motor	90W x 2
Heater	2.5W/3.75W KW x 2set
Machine size	4300 x 1120 x 1930 mm
Crate size	4600 x 1300 x 2100 mm
N.W.	1350 kgs
G.W.	1750 kgs
