

KGF40 Plastic Bottle Syrup Oral Liquor Filling & Sealing Machine

This machine is the main filling equipment of the sanitarian or syrup assembly line, which is mainly applied in the filling, lading and revolve, sealing of the 50-200ml plastic bottle transportation by feed bottle cover, track the local filling process, and is not easy to produce foam; it transports the lid by electromagnetic vibration with high lading rate. This machine is advanced in its combined filling-sealing operation with the compact structure.

Parameter:

- Production ability: 40~60 bottle/min
- Applied bottle: 50~200ml plastic bottle
- Sealing rate: $\geq 99\%$
- Power supply: 380V 50Hz Three-phase four-wire
- Power: 1.3Kw
