

TP1400 Single Punch Tablet Press Machine

TP1400 tablet compression machine is made of stainless steel and easy to operate. The tablet diameter and size can be adjusted by replacing the base formation or displacer. Two steel cams control stepping, does not need to adjust. The raw materials are placed in a vibrating vessel which is shoes shape, when the quantity is big; an external connection hopper is optional. The finished products discharge from a skewed slot, a collecting vessel can be placed here.

Features:

140 pieces/min, different tablet press dies with 5-25mm, capacity can be adjusted, and an external connection hopper is optional, easy to move, aseptic design, meet to CE standard, motor drive.

Technique Parameter:

Max. tablet size (mm)	20mm
Max. Pressure (KN)	5000kg
Production Capacity (p/m)	max 140p/m min 100 p/m
Overall size (mm)	660×390×660 mm
Weight (KG)	75kg
Power supply	220/240v 50/60Hz 8amp
