

MP-8 Effervescent Tablet Filling Machine

- Used to count the tablets and stack the tablet into one vertical column, then fill them in the bottle. With the bottle unscramble, capping machine, labeling machine combined into automatic packaging line.
- Integrated tablet stacking and bottling system, multi-channels feeding, and eight or more bottles-filling at the same time..
- High speed and high accuracy, visual inspection system ensure the accuracy is up to 100%.
- No bottle, not count and fill. Self-diagnose errors and stop working to make alarm at errors.
- Using our own original high anti-dust sensor technology, the machine works accurately with good stability in heavy dust conditions.
- Feeding evenly with quiver, special patent filling part protects materials from harm.

Technical Parameter:
