

VP-6 Automatic Bottle Unscrambler

VP-6 Automatic Bottle Unscrambler is consisting of bottle feeder, host machine and conveying motor. It is adapted to different conditions.

Features:

1. PLC control system combines all the drive devices together.
2. The set figures can be alternated via touch screen panel to meet your different requirements.
3. It is only necessary to change rotary plate in the bottle sorting barrel targeting different materials, and other parts can be freely adjusted.
4. The machine is mainly made of stainless steel 304 and aluminum alloy, strictly based on GMP.
5. Drive parts of this machine are protected by guard cover, more safe and environmental.
6. With elegant appearance and high efficiency.

Technical Parameters:

Production capacity	50ml-200ml bottle volume ≤ 9000b/h
	800ml bottle volume ≤ 6000 b/h
	1000ml bottle volume ≤ 4800 b/h
Diameter of the bottle	30mm-100mm
Bottle height	100-250mm
Power supply	AC380V, 50Hz
Main power	2.2kw
Weight	About 1500kg
Outer Dimension (L×W×H)	4670mm × 2050mm × 2500mm
