

Automatic Capping Bottle Machine

Product introduce

1. Automatic capping machine is often applied to food, medicine, and chemical industry production and processing.
2. Operators according to the material of bottle caps, type and tightness requirements, by adjusting the torque and rotational speed of the machine and screw cap time to tighten cap without damage.
3. Features: Automatic capping machine for spray bottle is wide and various kinds of bottle cap, has the cap oriented structure, to ensure the consistency of the pump head direction.
4. The operation is simple, can be freely according to bottle type conversion.

Technical parameters:

Voltage	AC 220v 50hz/110v 60hz
Power	500w
Dimension	200*65*150cm
Weight	80kg
Air pressure	0.4-0.6MPA
Suitable diameter	18mm-50mm
Suitable bottle	Bottle height: 50-400mm Bottle width: 20-100mm
Speed	30-45pcs/min
Capping torque	4-8 kg/cm
