

DPH300 Blister Packing Machine

1. DPH300 blister packing machine is special for packing tablets, capsules and little things etc.
2. Technical Information

- Max cutting speed: 240 cut/min (PVC line speed: max 10m/min)
- Max forming depth: 20mm
- Max forming area: 300x230mm
- Max index length: 240mm
- Max cutting length: 106mm
- Power: 380V, 50Hz, 3 phases
- Power consumption: about 10 kw
- Pressed Air: 0.6~0.8Mpa
- Water consumption: about 0.2m³/h (recommend equipped with water chiller)
- Temperature of water: 15~20°C

PVC:

- Thickness: 0.25~0.35mm
- Max width: 300mm Reel core diameter: 75~76mm
- Max reel diameter: 240mm
- Machine Dimension (LxWxH): about 4000x1250x2200mm
- Machine Weight: about 2500kg
- Noise: < 75dB

3. Function

Automatically complete the following functions: PVC feeding, PVC heating, PVC forming, batch number, cutting, blister output.
