

Double Sided Aluminum Foil Blister Packaging Machine

Double sided aluminum foil blister packaging machine, taken aluminum foil as packaging materials, is suitable for shading and moisture-proof packaging of plain tablets, coated tablets, capsules and other drugs with different specifications. As a machine with excellent performance and high efficiency, imported stepless speed control, entire column filling and automatic light control device are used to automatically adjust the feeding rate, thus improving efficiency. In line with the GMP standard requirements, the entire production process is controlled automatically.

Detailed Specifications

Productivity	22000--38000 Pcs/h
Max. package width	160mm
Power supply	220V,50/60HZ
Power of motor	0.4KW
Power of heater	2.4KW
Cutting rows	1-5
Thickness of material	0.05 0.20mm
Compressed air	0.4Mpa
Dimension	1260*800*1650mm
Weight	420kg

Feiyun is a professional double sided aluminum foil blister packaging machine manufacturer in China. Apart from blister packing machine, we also offer emulsifying machine, capsule filling machine, medical high purity nitrogen generator, coating machine and so on.
