

Automatic Bottle Unscrambler LPZ-2A

MAJOR CHARACTERISTICS:

1. More intelligent, beautiful, simulation arm, flexible pick up, solve the problem of irregular bottle on the sorting.
2. Large storage capacity of bottle bucket, one person can operate multiple machines.
3. No scratches, no friction, to ensure product quality.
4. Multiple machines can be controlled in series, fast speed and strong adaptability.
5. Visual error correction.
6. One key to change production, a variety of specifications and parameters of computer memory preservation.

TECHNICAL PARAMETERS:

Items	Performance
Overall size	Customized according to bottle sample
Applicable bottle	Customized according to bottle sample
Production capacity	≤90bottles/minute
Power supply	220V; 50Hz
Power	2kw
Weight	200kg/pcs
