

NJP-7800 Touch Screen Automatic Capsule Filling Machine

Introduction

1. NJP-7800C is the equipment with the highest output in China;
2. The equipment is fully enclosed, with 12 workers' rotary table and filling module arranged with 58 holes in four rows;
3. The whole machine is equipped with the automatic stop system of gate control and alarm, which can realize the function of electronic signature printing and industrial Ethernet connection;
4. The lower module has one-way movement with two shafts, and the imported polyurethane sealing ring prevents dust from entering the rotary plate;
5. The main engine is equipped with intelligent remote control, inching, test, easy to operate, to ensure personnel safety;
6. Automatic vacuum feeding and vacuum capsule can be installed, and the control system is operated by touch screen.

Specifications:

Model	NJP-7800C
Productivity	468000 capsules/h
Applicable capsules	00#, 0#, 1#, 2#, 3#, 4#, 5# machine-made standard capsules
Filled medicine type	Not adhesive or wet powders and small granules
Total power	14Kw
Power supply	380V 50Hz
Number of holes	58
Vacuum	0.4-0.6Mpa
Dust	24.5Kpa 210m ³ /h
Working noise	<75DB(A)
Load precision	±3%
Dimensions(mm)	1450X1920X2400 (LXWXH)
Weight	3500KG
