

Automatic Boxed Packing Machine

Automatic boxed packing machine is a light, point, gas, machine integrated high-tech product suitable for pharmaceutical, food, daily necessities, health care products, auto parts, hardware, household paper, and other boxed products.

Automatic boxed packing machine is a set of opening boxes, loading, folding boxes, sealing boxes, suitable for a variety of, multi-specification carton packaging machine, The whole machine frame and the parts of contact materials are all made of high-quality stainless steel and aluminum, the surface is polished, beautiful and generous appearance, strong and durable. This equipment can replace the workload. The machine can be used separately or another packaging online to form an assembly.

Product Deatures

1. Adopt automatic opening (suction) box, folding manual, unloading, feeding, batch number, sealing the box, detection, and waste removal procedures, with smooth operation and low noise;
2. PLC and human-machine interface automatic control operating system, cascade frequency control, high automation and easy to operate;
3. International brand electrical components for stable and reliable performance;
4. Mechanical overload automatic shutdown function is used to ensure human-machine safety;
5. Automatic elimination of the missing packaging or missing instructions, to ensure the quality of the finished packaging;
6. With fault display, alarm, and finished product count to facilitate maintenance and handling;
7. Automatic loaders and delivery mechanisms can be designed according to customer requirements;

8. It can be connected with an aluminum and plastic packaging machine, pillow packaging machine, filling machine, soap making machine, spray code machine (or supervision code system), labeling machine, weighing machine, online weighing machine, 3D packaging machine, thermal shrink packaging machine, bundle charter plane, and other production lines.

Application:

Auto-boxed packing machine is suitable for cosmetics, medicine, hardware, toys, electronics, and other types of product box packaging.

Product Parameters:

Product name:		Auto-boxed packing machine
Power		Ac220 V three-phase five-line power supply 50 Hz 2.5 kW
Gas consumption		20m ³ /h,(Pressure 0.5-0.8 MPa)
Production capacity		Host operating speed: 50-100 boxes/min
Packing	Dimension	3100x1380x1800mm
	Paper box Requirements	250 – 300 g/m ³ , depending on carton size
material	Specifications	Large Size: 200 *80 *50 mm (L*W *H)
	Small size	50*20*14mm (L*W *H)
	Paper box Requirements	55-65g/m ²
Weight		1.5 ton
