

## *Chilli Paste Filling Machine TPP-DG series*

Chilli paste filling machine widely used for fill kinds if liquid and oil, such as, water, juice, wine, liquid soap, liquid cosmetic, hand sanitizer, etc. It is widely used in the chemical industry, food, cosmetic, medicine, etc.

### **Introduction:**

This chilli paste filling machine series of filling machine is a product that is transformed and innovated with reference to foreign advanced filling machine technology. This pneumatic paste and cream filling machine the precision is high, the operation is simple,

This chilli paste filling machine is widely used in medicine, daily chemicals, food, pesticides and special industries. It is an ideal equipment for quantitative filling of high viscosity fluids and pastes.

### **Feature:**

The thick liquid filling machine contact parts of the materials are made of 304L stainless steel and meet the requirements of GMP certification.

The thick liquid filling machine filling amount and filling speed can be arbitrarily adjusted within the range of the model according to the user's needs, and the filling accuracy is high.

The thick liquid filling machine filling head is made of anti-drip and lifting filling device.

**Technical Parameters:**

| <b>Model</b>     | <b>TPP-DG100</b>         | <b>TPP-DG200</b> | <b>TPP-DG500</b> | <b>TPP-DG1000</b> | <b>TPP-DG2600</b> |
|------------------|--------------------------|------------------|------------------|-------------------|-------------------|
| Filling scope    | 10-100ml                 | 20-200ml         | 50-500ml         | 100-1000ml        | 260-2600ml        |
| Voltage          | AC 220/110V 50/60HZ      |                  |                  |                   |                   |
| Filling accuracy | $\pm 0.5\%$ -- $\pm 1\%$ |                  |                  |                   |                   |
| Power            | 20W                      | 20W              | 20W              | 20W               | 20W               |
| Air pressure     | 0.4-0.6 MPa              |                  |                  |                   |                   |
| Dimension        | 1020*340*340mm           |                  |                  |                   | 1020*400*400mm    |
