

## Inclined PU Belt Conveyor

Inclined PU Belt Conveyor is generally composed of unloading part, transmission part, transmission part, brake, checking device, tension, device, fuselage, deep groove roller device and tail device. Mainly suitable for food, hardware, chemical, agriculture, cosmetics, pharmaceutical and other industries in the free flow of products, such as apples, oranges, raisins, potato chips, dates, peanuts, candy, dried fruit, rice, spices, dried fruit and other granular materials vertical transportation.

### Features:

1. Adopt 304 stainless steel sanitary structure and food grade Belt.
2. Corrosion resistance and wear resistance.
3. Can be customized according to customer requirements.
4. Simple structure, easy to install and disassemble.
5. Labor saving and low energy consumption.
6. Small footprint, low maintenance and convenient maintenance.
7. High strength and long service life.
8. Allow large amount of material movement.
9. The speed can be adjusted at any time to control the lifting speed.
10. Belt are easy to clean.

### Parameters:

Conveyor belt material	PU
Machine material	304# stainless steel/ carbon steel
Transmission capacity	4-6M3/ H
Machine height	5110mm (Can be customized 200 cm to 7 m)
Voltage	Three phase AC220V 50HZ
Power supply	1.5KW
Bandwidth	100/ 200/ 300/ 400/ 500/ 600
