

Low Cost High Quality Double Swing Granulator

It is made of stainless steel. It's suitable for pharmaceutical, foodstuff, chemical, solid drink and other industries. It can make the stirred raw materials become granules with needed size or crush the blocked raw materials into small granules. The machine is mainly used for making granules with different specifications of pharmaceutical industry, chemical industry, foodstuff industry, etc.

Features

1. Novel design, compact structure and beautiful appearance.
2. It has such features as reasonable structure, flexible rotation speed, stable running, reliable performance, no dead corners and convenient operation.
3. It's easy to discharge and clean.
4. It effectively controls cross contamination and fully meets GMP requirements.
5. The mesh size can be customized.

Technical Parameter

Product Name	Low cost high quality Double Swing Granulator
Diameter of roller(mm)	160
Spindle speed	58r/min
Swing angle(degree)	360
Production capacity(kg/h)	400~500
