

DXDF Full Automatic Powder Packaging Machine

DXDF full automatic powder packaging machine is suitable for packaging powders of various densities. There are three sealing types for choosing: three sides sealing, four sides sealing and back sealing. With accurate measurement and easy cleaning, the equipment conforms to the national GMP standard. It has wide applications like pharmaceuticals, veterinary drugs, spices, mask powder, milk powder, pesticides, fertilizers packing.

Technical features:

1. Computer control, liquid crystal display, easy operation, stable and reliable operation
2. Stepping motor control pull bag system, high precision bag making
3. Set the bag to stop, after the machine stops, the heat-sealing mold is automatically opened.
4. Fully track the color mark, automatically complete the positioning and fixed length of the bag
5. Sealing method points: three sides sealing, four sides sealing, back sealed three models

Technical Parameters:

- Packing speed: 40-60 bags/minute
- Measuring range: 1-50 ml;
- Bag making size: length 40-160, width 40-120 mm
- Measurement method: screw
- Power supply: 380V 1.10KW three-phase four-wire system
- Weight: 185 kg
- Dimensions: 730×630×1580mm (L*W*H)
