

## Syringe Filling and Plugging Monoblock Machine

- Syringe Filling and Plugging Monoblock Machine composed of automatic container unscrambling, container feeding, filling, plug unscrambling, plug feeding, rejecting and finished product arranging etc.
- This machine adopting centrifugal arrangement technology.
- Less noisy, piston filling and lifting nozzle by SERVO motor to avoid spilling and bubble when filling.
- Grabing type for container feeding, plug feeding and finished products rejection, it improve accuracy for each station, and with stable working situation.
- The whole machine adopting PLC controlling, easy operation and adjustment.

### Technical Parameters:

Majar motor power rate	0.4KW
Capacity	35-40pcs/min
Accuracy	≥98%
Max. filling volume	50ml
Voltage	1P 220V 50Hz
Compressed air	0.6~0.8Mpa
Total power rate	5KW
Mahine siz	5000×4000×2200mm
