

## SM-5030LX / 6030LX Heat Shrink Machine

SM-5030LX shrinking furnace is a high-speed economical constant temperature shrink packaging machine developed by our company. It is made by introducing international advanced technology, adopts frequency conversion speed regulation, intelligent temperature control, high-quality stainless steel heating tube, and has good heat insulation effect. It is set to power off. Function, the entire packaging process of the transparent window is clear at a glance. It can be set to automatically shut down, avoid heat dissipation and save electricity. The machine has reasonable price, high efficiency, high cost performance, simple and convenient operation, precise and durable mechanical performance, strict structure design, no vibration during operation, stable and reliable operation, and it can be used as a stand-alone machine or in line with an automatic laminating machine.

### Technical Parameter

Machine type	SM-5030LX	SM-6030LX
Power supply/power	380V 50/60HZ 16KW	380V 50/60HZ 16KW
Package dimensions	1300×400×250	1300×500×250mm
Packing speed	0-20m/min;	
Furnace size	1500×500×300	1500×600×300mm
Machine size	1800×990×1300	1800×1100×1300
