

## *DPB-140E-I/III Automatic Blister Packaging Machine*

Blister Packaging Machine is the latest product developed specifically for small and medium-sized pharmaceutical plants, hospitals, etc. preparatory departments Thanks to frequency regulation and displacement amplitude, serviceability and rugged design, blister packing machine is the ideal equipment for packaging.

1. The main transmission part is adopted with swinging pin-wheel, long life, lower noise, and stable running.
2. Adjustable stroke can be suitable for various packaging, especially for the production requirements of small batch and various kinds of products.
3. Flat plate structure, can pack some special shaped products, such as elliptic shape, square shape, triangle shape etc.
4. PVC and Alu Foil adopt motor transportation, sensor control, transportation steady. 140B-I model machine is suitable for Alu/Pvc and Alu/Alu, equipped with special feeder, automatic rejection device.

**Technical specifications:**

Cutting frequency (times per minute)	6-35
Productivity (10 thousand pcs. / H)	2-11
Max. forming area and depth (mm)	140 * 110 * 14
The amplitude of the displacement (mm)	40-120 (value can be set according to user requirements)
Standard plate (mm)	80 * 57 (the value can be set according to user requirements)
Air pressure (MPa)	0.4-0.6
Air supply	≥0.2 m <sup>3</sup> /min
The total capacity	of 380 V / 220 V 50 Hz 3.6 kW
Main engine power (kW)	1.1
Solid parts of PVC (mm)	140 * 0.150.5
Aluminum foil PTP (mm)	140 * 0.02-0.035
Dialysis paper (mm)	50-100 g * 140
Cooling form	Tap or circulating water
Dimensions (mm)	2300 * 560 * 1410 (L * W * H)
Weight (kg)	600
