

Automatic Cellophane Overwrapping Machine for Perfume Box LM-YB

Integrating electric & pneumatic control system can be in one of the automatic variable speed three-dimensional transparent film wrapping machine. It adopts advanced PLC and servo motor control technology, with stable operation and higher productivity ratio. It's widely used in cosmetics, pharmaceutical, food industries, and has been recognized by the majority of users. Do not worry about the size of the speed with packaging products are not in place and other reasons.

Can also be customized according to customer product requirements.

Packaging:

Double-sides sealing BOPP, PVC film. Pull a variety of adhesive paste.

Maximum film roll diameter: $\Phi 320\text{mm}$

Main technical parameters:

- Packing Speed: 0-60 bags / min (speed based on product size can be used)
- Packing Size: Length 50-300mm 40-220mm wide and high 10-90mm
- Power Consumption: 3.5kw
- Voltage: 380V/50Hz
- Working Pressure: 0.6Mpa
