

CJXH-1600A Deodorant Aerosol Filling and Capping Machine

Machine Features:

1. Liquid filling, sealing machine and gas filling machine including booster pump, operator can complete liquid Filling, sealing and gas filling on one worktable, single operation, save two labor cost, and the filling speed and the labor intensity are same and other similar machines.
2. The machine is applied to fill various aerosol products; it is applied to batch produce in medium scale in aerosol filling factory.
3. The machine is widely used in cosmetic, fire protection, auto, chemical, foodstuff, Pharmacy etc industries, such as fixture, mousse, pesticide, freshener, detergent, Extinguishing agent, petroleum gas, DME and spray paint etc.

Technology parameter:

Model	CJXH-1600A 3 in 1
Production capacity:	3000-5000cans/shift (8 hours)
Max liquid volume(ml):	20-750ml(can be chosen)
Max Gas volume(ml):	20-500ml(can be chosen)
Sealing accuracy	$\leq \pm 1\%$
Working Pressure:	0.65-1.0Mpa
Maximum air consumption:	1.0(m ³ /min)
Applicable aerosol can diameter:	35-65 (mm)
Applicable aerosol can height:	80-350(mm)
Packing size	1000*600*1500mm 150kg 360*320*750mm 35kg
Available valve:	1"(25.4mm) and 20mm metered valve
