

Automatic PET/Glass Bottle Single/Double Side Stick Adhesive Labeling Machine SL-150B/250B

The fully automatic positioning vertical round bottle labeling machine is specially designed for round bottle labeling.

Single label and double label are workable. Space between the front and back label can be flexibly adjusted. Marking function; optional circumferential positioning detection device can be used to label the specified position on the circumferential surface. The device can be used stand-alone or with a packaging line or filling line.

Features:

- A. Easy to adjust, Directions in front, back, left, right, up and down, flat inclination angle, vertical inclination angle are 360°adjustable, it is suitable for different shapes of bottle, operating easily and efficiently.
- B. Automatic bottle splitting, It adopts the star wheel splitting mechanism to effectively eliminate the error caused by bottle itself to make sure the operation running smoothly and improving the stability;
- C. Touch screen controlling, human-computer interaction interface has operation teaching function, parameter modification is straightforward and various functions are easy to switch;
- D. Intelligent Managing, automatic photoelectric tracking, labels for every single object. Automatic correction for object without label and automatic detection to avoid wasting or missing stickers;
- E. Sturdy Construction and hygienic, it is mainly made of stainless steel and high-grade aluminum alloy, comply with GMP production requirements;
- F. 3 automatic functions, Stop working, production counting and power saving (when there is no production during the setting time, the equipment will be automatically transferred to power saving standby state)

Technical parameter:

Model	SL-150B	SL-250B
Label side	Single side	Double side
Capacity(meters/min)	12-38	12-25
Label length(mm)	10-300	10-250
Overall size(mm)	1800*1000*1500	2400*1300*1400
Weight(kg)	420	500
