

## Semi Automatic Filling Machine RF-C100

As the parts in contact with the machine are made of stainless steel, it has anti-embroidery and corrosion resistance properties such as toothpaste, salve, balm, fruit juice, jam, shoe polish, paint, ink, beverage, paste, chili sauce, cold Cream, Laoganma, butter, motor oil, alcohol, pesticides, PS plate cleaning paste and other materials.

This machine adopts compressed air control completely, no power is needed, especially used in explosion-proof environment, high safety; because of pneumatic control and mechanical positioning, the filling accuracy is high, controlled within  $\pm 1\%$ ; easy to use; low failure rate.

### Applictaion

It is suitable for pharmaceutical, daily chemical, food, pesticide and special industries. It is an ideal equipment for filling high-viscosity fluids. Because the machine works in an uncharged state, it is safer and the humanized design is more in line with modern enterprises.

### Technical Parameters:

Type	RF-C100
Filling volume	100-1000ml
Filling head	1
Speed	1-30 bottles/min
Filling material	Paste
Air consumption	0.1m <sup>3</sup> /min
Size	440*440*1500mm
Weight	50kg
