

CXD-4/8 Forming Bag Filling and Sealing Machine

This series machine is used for kinds of bag filling and sealing, for liquid package such as milk, soybean milk, yogurt, jelly, fruit juice, beverage, soy sauce, vinegar, wine, cooking oil, detergents, liquid chemical and semi-fluid etc. The machine's performance has gotten high reputation from our clients.

The same series of models, nozzle is divided into: 4, 8, 12, 16, 24 nozzles/set.

Technical parameters:

Model	CXD-8
Production capacity	1000-3000 (bag/h)
Filling volume	50-500 (ml/bag)
Power supply	220 (V) 50 (Hz)
Power	750 (W)
Air source	0.8 (mpa) 0.3 (m ³ /min)
Weight	200 (kg)
Size	1260x580x1280 (mm)

According different material, choose different type

1. Standard type: adopt Sanitary Centrifugal Pump, it fit the liquid without sarcocarp and fruit particle, low concentration and easy to flow.
2. ropiness type:
 - (a) Adopt Sanitary screw pump, it fit the material without sarcocarp and fruit particle and high concentration and low fluidity.
 - (b) Adopt the Sanitary dextral pump. It fit the material with sarcocarp and fruit particle, high concentration and low fluidity.
3. Large dose type: adopts the sanitary pneumatic plunger pump, it fit the dose between 200-500ml and the fluidity liquid.
