

## Automatic Filling & Screw-capping Machine

This machine has the function of automatic bottle charging, positioning, filling, cap charging and screw-capping and can be used in paramedical, food, cosmetic, chemical and other industries.

### Features:

- It uses the sensor for automatic checking to achieve no-bottle-no-filling and stop the filling process automatically or give an alarm.
- The operation and debugging of PLC and touch screen control system are simple and convenient. The quantity, speed and output can be set on the touch screen directly.
- The intelligent detection is steady. Our machine adopts the intelligent detecting system and high-quality detecting elements so that it can find out all kinds of errors and stop the working procession or give an alarm in a short time. Such as whether the bottle is in the right position, whether the machine conveys normally or not, etc.
- This machine can be used with other machines, such as the labeling machine, date printing machine, etc.
