

Pure Water / Tea / Juice Filling Machine GF-JF-A1

1. Low loss, low noise
2. High quality, high efficiency
3. Safe use
4. Fully automatic

Description:

Moderate temperature filling technology adopts normal PET bottle and fills tea drinks and drinks juice at 68°C. Products can reach the requirement of shelf life without any preservatives. The capacity ranges from 5000BPH to 15000BPH.

Specifications:

PET bottle 4/5 in 1 cooling chain filling machine makes up sterilize, washing, filling, capping and CIP rinsing, which bases of recommending, digesting and receiving from foreign advanced technology. According to hot filling working process of China's tea and juice beverage, we develop and design the advanced PET bottle hot filling machines in domestic.

Technique Parameters:

Model		GF-JF-A1
Working position		washing bottle 40 bottle washing 40 filling 40 capping10
Capacity		15000BPH (500ml/B)
Suitable bottle model	Bottle dia.	50 ~115mm
	Bottle height	190 ~320mm
Air source pressure		0.7MPa
Air consumption		0.8 m3/min
Bottle washing water consumption		2.4t/h
Working pressure (AC)		380V
Control voltage (DC)		24V
Main motor power		5.5KW
Dimension		L7100-W3000-H2200
