## CFD8-LB Auto Eight Joint Cups Filling and Sealing Machine

Under all our engineers' joint effort, summing up the experiences of jelly filling and sealing machine manufacture, and absorbing the principle of vacuum blister machine, we recently launch the new product-CFD8-LB Eight-connected-cup Filling and Sealing Machine. The machine is suitable for the packing of the high-grade plastic cup such as milk, juice drink, ketchup, etc. The food product appearance well, side-cut is trim, sealing is tight.

The machine work flow is: feed the cup manually--forced filling--disinfection by ultraviolet light--film feeding--film date printing--Photoelectric pattern tracking--hot sealing--moulding cutting--product pushing-out.

### Technical parameters:

参数Parameter	机型Model	CFD-4	CFD-8	CFD-16
包装速度(杯/小时) speed(cup/h)		2800-4400	6500-9600	1200-18000
充填容量(ml) filling volume			≤150	
使用电源 power used			380v/50Hz	
调速方式 Speed adjustment mode			无极调速 Stepless Speed	
耗气量(m <sup>3</sup> /min) air consumption		0.6	A 0.5 B 0.6	0.75
整机用电量(kw) Electric consumption		3	A 5 B 6	6
