

BJ380E High Speed Pillow Type Automatic Packaging Machine

BJ380E adopt advanced numerical control technology and Micro PT (MICRO PROGRAMMABLE TERMINAL), the PLC system can control automatically the machine to complete all kinds of movements, adjust and transfer functions, coordinate sorts of technical specifications and alarm display in screen made up perfect computer control system.

PID accurately controls the sealing temperature and seal are firm, beauty. Adoption of strong function and stable importing electric parts, it is an ideal packaging equipment for sealing materials& film, making bags, filling, wrapping, sealing, cutting by one step.

Application:

The BJ380E use PP & PE films, Polypropylene, Aluminum foil and other can be used for heat-sealing as packaging materials, the machine is suitable for packing food, medicine, chemical & solid or tray merchandise such as instant noodles, moon-cake, biscuits, chocolate, frozen food, ice-cream, blister tablets plate, soap etc.

Main Specification:

- Packaging Size (mm): 60~320mm x 70~100mm x 10~50mm (LxWxH)
- Operating Speed (Bags/min): 50~150
- Power: 220V/50Hz/3.8kw
