

Carbonated Drink Filling Machine Fully Automatic NC12-12-5D

The series equipment is used to fill all kinds of carbonated drinks contained in PET bottle. It realize washing, filling and capping in one machine with complete automation, and is suitable for all kinds of bottles. The bottleneck blocking makes the process of changing bottles easy by only adjusting the height of conveyor chain. The filling process adopts the micro-pressure technology, which makes filling process faster and more stable. The main machine adopts advanced PLC control, and the key electric elements are from famous international brand. The equipment is designed scientific and reasonable with high production and quality.
