

Automatic Feeding Flow Chocolate Packing Machine (JY-L1000)

Application:

Confectionery factory, food factory, commodity factory, etc.

Advantage:

Horizontal Feeding & packing machine can connect directly with the food production line, like bread, biscuit, chocolate, chocolate bar, cake, wafer etc. In the horizontal feeding, it will not damage the product surface. Our packing machine is widely applied in the chocolate bar, chocolate, biscuit, bread, cake, wafer packing. The machine is designed according to European level, equips with high level electrical parts.

Electrical Parts:

- Servo Motors adopt Japanese Yaskawa Brand (five or seven servo motors for the choice).
- Frequency converters adopt the France Schneider.
- PLC and Touch screen use the Omron.
- The electrical parts and requirement is customized according to the requirement.

Technical parameters

| Model | JY-L1000 |
|-------------------|--|
| Packing Type | Pillow Pack |
| Packing Speed | 50-800pcs/min (according to product size and shape) |
| Packing Product | Chocolate, Bar Products, Wafer, Biscuit, Pie, Bread,Nougat, Coating Product etc. |
| Product Dimension | According to client's requirement |
| Total Power | 9.5kw |
| Voltage | 380V/50HZ,3phase(customized) |
| Weight | 3500kg |
| Outside Dimension | 9280*1350*1795mm(customized) |
| Wrapping film | OPP, CPP, PET, Aluminium plating film, aluminium plastic film, hot-sealing film or cold sealing film, etc. |
