

JA-30LB The Dome Auger Filler Machine

1. The machine is specially designed and manufactured for powder.
2. Made of 304 stainless steel, has food hygiene anti-corrosion chemical products certification.
3. The hopper can be opened horizontally and the screws can be removed without a tool.
4. If you measure different weight, just change screws. Adapt to a variety of powder material.
5. The servo motor drives the feed screw to rotate and cut off.
6. The performance is stable and reliable, and the adjustment is simple and quick.

Product Parameters:

Model	JA-30LB
Hopper capacity	30L
Package weight	10~500g
Package accuracy	±1%
Fill rate	30~100times/min
Total powder	Three phase 380V
Power	1.2kw
Auger Diameter	Φ17 ~ Φ57
The whole weight	40kg
Whole volume	L800xW500xH800mm
